REACH Regulation (EC) 1907/2006

Article 33 statement

To professional/commercial users or distributors of Schiller devices

One or more articles shipped by SCHILLER AG contain substances which were included in the European Chemicals Agency's list of *Substances of Very High Concern* (SVHC), available at <https://www.echa.europa.eu/candidate-list-table>.

According to *Regulation (EC) 1907/2006 Article 33* ("REACH"), suppliers of articles containing a substance in the SVHC list in a concentration higher than 0.1 % by weight are required to communicate information regarding safe use of the substances. Please note that inclusion of a substance in the SVHC list does not restrict its placement on the market or its use.

SCHILLER AG will continue to monitor the regulatory requirements related to chemical substances and will update this document should the need arise.

The list of substances and articles concerned can be found in the annex of the present document.

The Art of Diagnostics

Annex: List of substances in SVHC list used in Schiller devices

The substances listed below may be contained in parts of the specified devices in a concentration higher than 0.1% by weight. Devices and parts that do not contain SVHCs are not listed. No specific instructions on safe use are required as the substances in question will not be released in significant amounts under normal or reasonably foreseeable conditions of use.

Substance Name	Dodecachloropentacyclo[12.2.1.16,9.02,13.05,10]octadeca-7,15-diene or Dodecachlorodimethanodibenzocyclooctane (CAS 13560-89-9)	
Use	Flame-retardant additive in cable jackets; EEE components	
Article number and name of devices containing the substance	0.775000	ARGUS PRO LifeCare 2
	0.760400	ARGUS PB-1000LP Cath Med 4xIBP
