

DEFIGARD® HD-7

Renewing defibrillation

DEFIGARD® HD-7

Renewing defibrillation

Discover the DEFIGARD HD-7, SCHILLER's latest defibrillator / monitor. Compact and lightweight, benefit from its easy-to-use interface to access all main functions.

ALWAYS READY

The DEFIGARD HD-7's automatic self-tests are a time saver during routine device tests.

The DEFIGARD HD-7 provides paper printout but also supports paperless workflows.

Self-test results are automatically sent via a secure Wi-Fi connection to SEMA, SCHILLER's data management solution, for a quick and easy paperless review by healthcare professionals.

A LED clearly informs the user if the device is ready for use.

FAST TIME TO SHOCK

The DEFIGARD HD-7's fast charging time greatly minimises time to shock.

Unlike in a conventional AED, the DEFIGARD HD-7's cardiac rhythm analysis starts at the end of the CPR cycle which shortens the actual analysis duration as well as the "hands-off" time.

As the DEFIGARD HD-7 charges during the cardiac rhythm analysis, the shock is immediately available if it is recommended.

Conventional AED

CPR FEEDBACK

The DEFIGARD HD-7 helps achieve highest efficiency in chest compressions:

- ❖ **Metronome feature:** delivers a steady rhythm to follow.
- ❖ **FreeCPR (optional):** provides feedback on the frequency of the chest compressions through the defibrillation pads, no additional sensor required.
- ❖ **ARGUS LifePoint (optional):** provides feedback on the frequency, depth and recoil* of chest compressions. The DEFIGARD HD-7 indicates a color

coded visual assistance of the chest compressions during CPR. The sensor ARGUS LifePoint is shaped to perfectly fit the palm of your hand. It is made of durable rubber, is reusable and easy to clean.

*Recoil not available in the UK, France, Germany and USA.

INTUITIVE DESIGN

The DEFIGARD HD-7's one-step mode selector allows intuitive and straightforward mode selection between AED, manual defibrillation, pacing and monitoring.

The user-friendly tactile *Touch'n' Save* interface allows direct access to the desired feature without losing time.

The DEFIGARD HD-7's interface has been developed to meet healthcare professionals' needs. For each selected mode, a global overview of patient vitals and needed actions is available.

Depending on lighting conditions, the user can adapt the display (high-contrast mode).

A UNIQUE DATA MANAGEMENT SOLUTION

Transfer data to be reviewed and managed by SCHILLER's data management solution SEMA. Patient data is available continuously from outpatient care to intra-hospital care.

The DEFIGARD HD-7 also facilitates device pool management by deploying device configurations or software updates remotely.

SEMA supports data management for the entire SCHILLER product range.

CYBERSECURITY

The DEFIGARD HD-7 ensures an extremely secure connection to the server using WPA2-Enterprise, the highest security standard in terms of wireless networks.

With the DEFIGARD HD-7, patients and their medical data are safe.

INNOVATIVE PADDLES

For additional flexibility, the DEFIGARD HD-7 is also available with defibrillation paddles, featuring:

- ❖ **Impedance LED:** check the patient's impedance at a glance via the illuminated LED
- ❖ **Key operating buttons:** energy selecting, charging and shocking can all be operated through the paddles' buttons
- ❖ **Paediatric mode:** simply remove the paddle's adult electrode plates to switch to paediatric mode. The device and energy levels will also adjust automatically.

INTERNAL DEFIBRILLATION

Internal defibrillation mode (optional) for open-heart surgical procedures, with a full range of spoon sizes and energy levels.

DEFIGARD® HD-7

Matching all healthcare professionals' needs

INNOVATIVE PADDLES

Defibrillate with precision when using the paddles. Set the required energy level, check impedance, charge and defibrillate with the dedicated colour-coded buttons.

A UNIQUE EXPERIENCE

Equipped with a large 7" touchscreen, the DEFIGARD HD-7 benefits from a powerful Touch'n'Save interface and allows storage of intervention data.

CONNECTED DEVICE

Transfer intervention data swiftly to be reviewed and managed in SEMA, SCHILLER's data management solution.

INTEGRATED PRINTER

A large 3-channel built-in printer allows different printing configurations, amongst which the post-defibrillation report.

CAN BE MOUNTED ON A TROLLEY

The unit can be attached to the patient bed with hooks. A trolley is available (optional).

ALWAYS READY

The DEFIGARD HD-7 performs regular automatic self-tests and informs on its ready-to-use status through the blinking LED.

SIMPLIFIED USE

A one-step mode selector allows you to easily select the desired mode: semi-automatic AED, manual defibrillation, monitoring or pacing.

OPTIMISED USER INTERFACE

3 simple steps to follow for a clear overview during an intervention.

ACCURATE MONITORING

High-quality measurements:

- ❖ SpO₂ (optional): MASIMO or Nellcor™ technology
- ❖ 6-lead ECG: SCHILLER technology
- ❖ EtCO₂ (optional): MASIMO technology
- ❖ NIBP (optional): SCHILLER technology

SINGLE CONNECTOR

The DEFIGARD HD-7 has the same connector for pads, paddles and spoons.
