# REACH Regulation (EC) 1907/2006

## Article 33 statement

To professional/commercial users or distributors of Schiller devices

One or more articles shipped by Schiller AG include substances which were included in the European Chemicals Agency's list of *Substances of Very High Concern* (SVHC), available at <https://www.echa.europa.eu/candidate-list-table>.

According to *Regulation (EC) 1907/2006 Article 33* ("REACH"), suppliers of articles containing a substance in the SVHC list in a concentration higher than 0.1 % by weight are required to communicate information regarding safe use of the substances. Please note that inclusion of a substance in the SVHC list does not restrict its placement on the market or its use.

Schiller AG will continue to monitor the regulatory requirements related to chemical substances and will update this document should the need arise.

The list of substances and articles concerned can be found in the annex of the present document.

The Art of Diagnostics

## Annex: List of substances in SVHC list used in Schiller devices

The substance(s) listed below may be contained in parts of the products listed below in a concentration higher than 0.1% by weight. The substance(s) listed do not pose a safety risk to customers if instructions regarding safe use are followed.

<b>Substance Name</b>	Dodecachloropentacyclo[12.2.1.16,9.02,13.05,10]octadeca-7,15-diene or Dodecachlorodimethanodibenzocyclooctane (CAS 13560-89-9)	
<b>Use</b>	Flame-retardant additive in cable jackets	
<b>Article number and name of devices containing the substance</b>	0.775000	ARGUS PRO LifeCare 2
	0.030000	CARDIOVIT CS-200
	0.030100	CARDIOVIT CS-200 ErgoSpiro
	0.035000	CARDIOVIT CS-200 Excellence
	0.070000	AT-102
	0.075000	AT-102 plus
	0.080000	AT-101
	0A.102000	CARDIOVIT CS-200 Touch Box
	0A.107000	AT-1 G2
	0A.108000	AT-102 G2
	0A.800000	Diagnostic Station DS20
	0.760215	PB-1000LP Merge 4xIBP
0.760400	PB-1000LP Cath Med 4xIBP	
<b>Instructions regarding safe use</b>	Not required. Will not be released in significant amounts under normal or reasonably foreseeable conditions of use.
